

## DS1302 clock module

DS1302 clock module

1. Onboard DS1302Z clock chip
2. onboard 32.768KHZ crystal oscillator, providing accurate clock signal for the module
3. Onboard CR1220 SMD battery holder
4. pins in common use have been extracted, the pin is standard 2.54mm
5. PCB size: 29 (mm) x17 (mm)

Note: We' ll give away schematic diagram, 51 test procedure and relevant data after purchase

Shipping list:

DS1302 clock module \*1

Note: due to transport limitations, the module itself does not contain battery
